

Egypt

Third Issue.

5 Para.

Second Printing 1875.

The 5 Para was the only stamp of this issue which was printed from a composite die. Proof is found in the second printing where the value tablets have been transposed.

Perf $12\frac{1}{2}$

tête bêche
→

Perf $13\frac{1}{3} \times 12\frac{1}{2}$.

An example of one of only four horizontal tête bêche positions on the sheet. The plating will be either 151~152 or 191~192.
